MuleSoft offers Salesforce Enterprises opportunities for better connectivity and integration, allowing you to feed real-time data to Salesforce and your other applications.

Whether you're looking to **get more value from your Salesforce investment**, need to **connect your key ERP, HCM, legacy systems, link Salesforce to your marketing** or customer applications, **or build mobile web applications**, Bits In Glass (BIG) has the expertise to **help enable your IT team to quickly access data and speed your time to value**. Our experienced MuleSoft and Salesforce practices ensure you are in the hands of knowledgeable experts, while our pure Agile Delivery capabilities get you results faster.

ABOUT BITS IN GLASS

Bits In Glass is a mature, professional services firm that empowers its clients to do business more efficiently. Since partnering with MuleSoft and Salesforce, we have continuously delivered exceptional business value to our clients. Our employees are MuleSoft and SFDC certified and have gone through an extensive internal training program which is reflected in our exceptional delivery record.

Connect Salesforce: Integrate CRM Systems

Fast up-to-date data gives you the edge over your competitors. MuleSoft's CRM integration templates close the delivery gap, making it easy to consolidate, synchronize and migrate CRM and file data into Salesforce from multiple instances and applications.

Unlock your back office ERP or legacy applications

Get a real-time 360° view of your customer and automate business processes using MuleSoft's ability to connect Salesforce to your back office applications like SAP, NetSuite and Oracle EBS, or legacy applications that have trapped data.

Engage customers with Salesforce integration

Provide better customer experiences by connecting all your applications to Salesforce. MuleSoft seamlessly connects to applications beyond Salesforce.

OUR SERVICES

- ◆ MuleSoft Quick Start: get your first systems integration running in 2 - 6 weeks
- ◆ MuleSoft architecture consulting and training
- ◆ MuleSoft implementation services – a complete team to manage and deliver your end to end project
- ◆ MuleSoft development resource augmentation – bring a scalable development approach to get your project completed ahead of schedule
- ◆ MuleSoft Application Maintenance and Support (AMS) – a cost effective solution to protect your existing MuleSoft investments
