

# APPIAN ACCELERATOR FOR FAST RESULTS

Member benefit details are a central piece of a health plan's operations, and they are a central component for sales and enrollment, claim pricing and adjudication, and monitoring the accumulation of deductibles and out of pocket costs by the plan's membership. Even though this information is central to these processes and many other operational touch points, many organizations still rely on manual processes to manage the creation, review, federal/state filing, and subsequent operational distribution of these plan designs causing inefficiencies and risk of human error.

#### WHAT IS AN APPIAN ACCELERATOR?

An **Appian Accelerator** is an application that covers the core functionality for a particular business function. It provides Appian customers with a "running head start" so they can expect to complete their Appian implementation in less than half the time as compared to starting from scratch. Appian Accelerators reduce risk, reduce implementation timelines, deliver applications that are Appian Certified as compliant with Appian Best Practices and, most importantly, reduce time to value and that means ROI starts in weeks not months.

The best part is that customers can still overlay their specific business needs or "secret sauce" on top of an Appian Accelerator by working with our team of domain experts and Appian technical consultants.

# BENEFITS COVERAGE MANAGER APPLICATION

BCM provides a centralized system for health plans to configure, review, and distribute benefit details throughout your organization. The application streamlines and automates the definition, review, and approval of plans in advance of critical deadlines. When changes are required, the application provides a central point of information, removing the need to manually update plan data within dependent systems and documents where latency and human error can negatively impact operations, and provides this data for consumption for multiple business needs.

## ACCELERATOR BENEFITS & FEATURES

### Key Benefits

BCM shortens the lead times associated with bringing your plan to market and providing a central hub for benefits data to be distributed:

- ◆ Fast document generation and coverage calculations for state and federal filing
- ◆ Quick and easy plan sales and member enrollment
- ◆ Claim adjudication and pricing
- ◆ Member accumulator management

### Key Features & Functionality

- ◆ Create and manage a summary list of services that may be associated with one or more plan types (i.e. medical and pharmacy plans).
- ◆ Set guardrails around member cost shares to ensure that they are defined within organizational standards.
- ◆ Plan service coverages may be set based on the respective coverage tiers, and data points are aligned with CMS' coverage calculator to ensure compliant values are produced for your summary of benefits and coverage (SBC) Documents using tools such as Blue Prism.
- ◆ Template for customizing plans with sales prospects.
- ◆ Administrators can bundle medical plans with other Riders (i.e. pharmacy, dental, vision, etc) to create comprehensive coverage packages from multiple plan portfolios.
- ◆ Plans are passed through approval workflows to ensure that they are evaluated and approved by organizational stakeholders.

## ABOUT BITS IN GLASS

Bits In Glass is a mature, professional services firm that empowers its clients to do business better. Since partnering with Appian in 2008, we have continuously delivered exceptional business value to our clients. Our employees are Appian certified and have gone through an extensive internal training program, which is reflected in our Appian A-Scores.

*Bits In Glass provides services in the US and Canada with offices in Denver, Dallas, Edmonton, Calgary, Toronto and Montreal.*
