

APPIAN ACCELERATOR FOR FAST RESULTS

Bits In Glass' Clinical Trials Intake (CTI) application is a complete framework that coordinates the various intake, regulatory, legal and feasibility considerations of a clinical trial into a simple tracking system. Built from the ground up with a modular design, CTI is easily configurable and can be tailored to match any existing intake process with pre-built interactions for regulatory compliance, regulatory and operational checklists, legal negotiation, document management and has room to add more.

WHAT IS AN APPIAN ACCELERATOR?

An Appian Accelerator is an application that covers the core functionality for a particular business function. It provides Appian customers with a “running head start” so they can expect to complete their Appian implementation in much less time than starting from scratch. Appian Accelerators reduce risk, reduce implementation timelines and delivery applications that deliver ROI faster.

The best part about Appian Accelerators is that customers can still overlay their specific business needs or “secret sauce” on top of an Appian Accelerator by working with our team of domain experts and Appian technical consultants.

CLINICAL TRIAL INTAKE APPLICATION

When starting a clinical trial, clinicians need to intake patients quickly and our CTI application eliminates the need for spreadsheets, organizes the all of required onboarding tasks, and notifies key stakeholders automatically. CTI allows multiple departments to collaborate on documents and receive important notifications instantly so staff can get to work on meeting the needed legal, financial, or regulatory requirements.

ACCELERATOR BENEFITS & FEATURES

Benefits

Tailor any existing clinical trial intake process with pre-built interactions for:

- ◆ Regulatory compliance
- ◆ Regulatory & operational checklists
- ◆ Legal negotiation
- ◆ Document management

Features & Functionality

- ◆ Quickly intake patients with flexible and configurable dynamic case management
- ◆ Assign and collaborate on cross-departmental tasks using access portals for departmental specific tasks, including sending notifications to departments (ie: Legal, Financial and Regulatory)
- ◆ Easily find and control intake files using document management capabilities
- ◆ Track user interactions and activity with configurable auditing and reporting
- ◆ Highlight and anticipate potential resource constraints and bottlenecks with visual resource forecasting

ABOUT BITS IN GLASS

Bits In Glass (BIG) is an award-winning software consulting firm helping companies outpace the competition, drive rapid growth, and deliver superior customer value through technology. Since partnering with Appian in 2008, we've continuously delivered exceptional business value to our clients. Our employees are Appian certified and have gone through an extensive internal training program, which is reflected in our A-Scores.

Bits In Glass provides services in Canada and the United States with offices in Edmonton, Calgary, Toronto, Montreal, Denver, and Dallas.
