

APPIAN ACCELERATOR **FOR FAST RESULTS**

Today's home health organizations are constantly challenged with effectively managing their daily operations while providing high-quality care. From scheduling complexities to limited visibility into appointment status, routing, and nurse safety, home health organizations need an easy-to-use system that provides operational oversight and control while keeping the focus on high-quality patient experiences.

WHAT IS AN APPIAN ACCELERATOR?

An Appian Accelerator is an application that covers the core functionality for a particular business function. It provides Appian customers with a “running head start” so they can expect to complete their Appian implementation in much less time than starting from scratch. Appian Accelerators reduce risk, reduce implementation timelines and delivery applications that deliver ROI faster.

The best part about Appian Accelerators is that customers can still overlay their specific business needs or “secret sauce” on top of an Appian Accelerator by working with our team of domain experts and Appian technical consultants.

HOME HEALTH MANAGER APPLICATION

Our Home Health Manager (HHM) application provides real-time schedule management and home health visit management capabilities. HHM is easily configurable and can be expanded to accommodate patient and care team scheduling along with any home health services provided to your patients. It provides the transparency and traceability necessary for supporting high-quality care for home health patients.

ACCELERATOR BENEFITS & FEATURES

Benefits

- ◆ Easily match the right nurse to the right patient at the right time
- ◆ Eliminate manual spreadsheets with an integrated digital platform
- ◆ Adjust schedules as needed with appointment reassignment capabilities
- ◆ Improve and support patient and nurse safety with instant notifications, alerts, and backup documentation

Features & Functionality

- ◆ Support for nurse appointment scheduling with suggested times based on availability, appointment type, and certification level
- ◆ Integrates with Google Maps to create nurse appointment route details
- ◆ Provides supervisors with a dashboard to manage all nurse appointments
- ◆ Manages notifications for emergencies and safety alerts
- ◆ Captures clinical and social observations with photo upload capabilities
- ◆ Records and displays current and historical patient vitals
