

APPIAN ACCELERATOR FOR FAST RESULTS

Bits In Glass

Your Business. Optimized.

Property management organizations are challenged with effectively and efficiently managing the critical move in and move processes. Bits In Glass' Move In Move Out (MIMO) application is an easy-to-use solution that reduces highly manual workflows and provides operational oversight and control while keeping the focus on quickly and accurately completing onboarding and offboarding of tenants.

WHAT IS AN APPIAN ACCELERATOR?

An Appian Accelerator is an application that covers the core functionality for a particular business function. It provides Appian customers with a “running head start” so they can expect to complete their Appian implementation in much less time than starting from scratch. Appian Accelerators reduce risk, reduce implementation timelines and delivery applications that deliver ROI faster.

The best part about Appian Accelerators is that customers can still overlay their specific business needs or “secret sauce” on top of an Appian Accelerator by working with our team of domain experts and Appian technical consultants.

OF THE YEAR

MOVE IN MOVE OUT APPLICATION

Residential property managers need all the help they can get when it comes to administering the details required for property maintenance and tenant moves. Our Move In Move Out (MIMO) application is a complete all-in-one solution for managing every aspect of the property from vendor management and maintenance to complex moves. By providing complete operational oversight and Yardi integration, property managers using the MIMO app will be more efficient, responsive, and able to provide better tenant and owner services.

ACCELERATOR BENEFITS & FEATURES

Benefits

- ◆ Complete operational oversight and workflow management of properties
- ◆ Improve efficiencies and provide better tenant/owner services
- ◆ Track property issues over time
- ◆ Manage all tasks and project statuses
- ◆ Access to private vendor work orders and tasks
