

APPIAN IDEA FOR FAST RESULTS

As organizations grow their business, they are constantly challenged with finding new ways to streamline and improve internal processes. Tracking and managing a company's physical assets is no exception and is becoming more and more important as companies focus on supporting their offices and staff while controlling costs. Bits In Glass' Physical Asset Manager (PAM) application is an easy-to-use solution that provides organizations of all sizes with the ability to manage the full lifecycle of their physical assets.

WHAT IS AN APPIAN IDEA?

An Appian Idea is a proof-of-concept that demonstrates the art of what's possible with Appian. These applications provide customers with a light version or foundation for a particular use case or business function where Appian can be applied. Appian Ideas are meant to be expanded on and they eliminate the need to design and develop from scratch.

The best part about Appian Ideas is that customers can expect a flexible, scalable solution where they can easily build up the functionality and quickly deliver value while working with our team of domain experts and Appian technical consultants.

PHYSICAL ASSET MANAGER APPLICATION

Our Physical Asset Manager (PAM) application allows operations staff to easily establish a full inventory of your company's assets, providing the necessary linkages and visibility into the health and assignments of all assets. This flexible solution can be tailored to your specific needs and act as the source of truth for both physical assets and intellectual property.

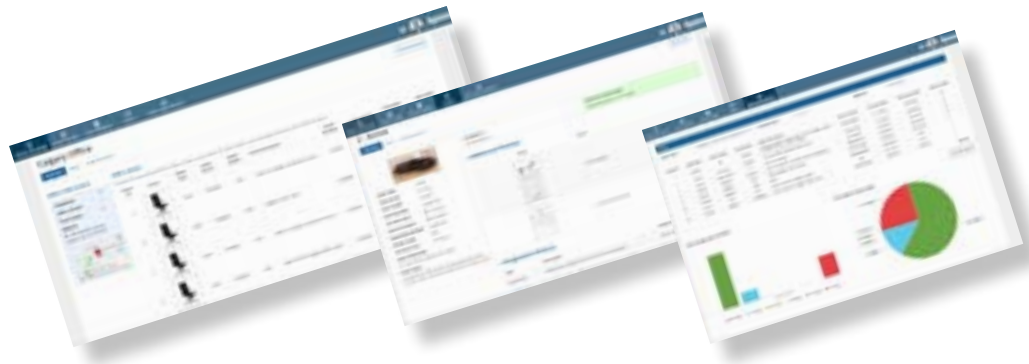

IDEA BENEFITS & FEATURES

Benefits

- ◆ Easily manage the lifecycle of all your businesses' physical assets
- ◆ Can be customized to meet any organization's needs
- ◆ Acts as a hub for both physical and intellectual property
- ◆ Can be exported to Excel for further reporting needs
