

CLINICAL TRIAL INTAKE (CTI) APPLICATION

When starting a clinical trial, clinicians need to intake patients quickly. Our Clinical Trial Intake (CTI) application eliminates the need for spreadsheets by organizing all the required onboarding tasks into one easy-to-use online tool.

CTI allows multiple departments to collaborate on intake documents and receive important notifications instantly so staff can get to work on meeting all legal, financial, and regulatory requirements of a clinical trial.

BENEFITS

- ◆ Intake patients faster and more efficiently
- ◆ Provides complete clinical trial intake oversight
- ◆ Improves cross-departmental collaboration
- ◆ Better anticipate resource constraints and bottlenecks
- ◆ Can be customized to match any existing process

FEATURES

- ◆ Pre-built interactions for operational checklists, legal negotiations, and document management
- ◆ Configurable and dynamic case management
- ◆ Access portals for department specific tasks
- ◆ Automatic notifications for important requirements
- ◆ Customizable reporting and auditing capabilities
- ◆ Visual resource forecasting

ABOUT BITS IN GLASS

Bits In Glass is an award-winning software consulting firm that uses technology to solve complex business challenges and digitally transform operations across multiple industries and verticals.

Our expert consultants help our clients unlock their potential to outpace the competition, drive rapid growth, and deliver superior customer value through digital transformation.

We have North American coverage with offices in Edmonton, Calgary, Toronto, Montreal, Denver, and Dallas.
