

Bits In Glass

Unlock Your Potential

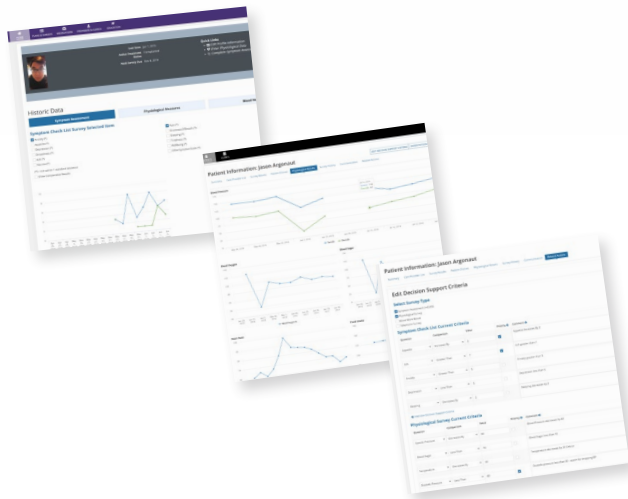

MANAGE MY CARE (MMC) APPLICATION

Patients are demanding more transparency and control of their patient information and increasingly want to be able to access this information directly. With Manage My Care, patients and care providers have better insight into

and access with instant reminders, event notifications, and alerts that support a proactive approach to requesting information from patients as needed. It helps healthcare organizations improve patient care and communication.

BENEFITS

- ◆ Offer patients more transparency and control
- ◆ Provide real-time insights to care teams
- ◆ Ensure timely and relevant decisions
- ◆ Enhance individualized healthcare
- ◆ Improve chronic and long-term disease management

FEATURES

Patient Portal

- ◆ Submit quantitative information like heart rate, blood pressure, weight, pulse, fluids, etc.
- ◆ Capture qualitative information with symptom assessments and long-term health plans
- ◆ Review previously submitted information for review and lifestyle planning
- ◆ Raise concerns to care providers to review immediately or during the next appointment

Provider Portal

- ◆ Real-time access to patient information, vitals, and continuum of care
- ◆ View and respond to patient communications
- ◆ Compare patient submitted information against a comparative visualization of population data
- ◆ And much more!
